

## 400 PLUS JAM JURASSIC ARK OPEN DAY SEPTEMBER

**JOSEPH HUBBARD** (left) is seen speaking to the overwhelming all age crowd, as Clem Grieger (kneeling right) assists the first public display of our new Strata machine experiments to show rock layers form both quickly and sideways, both of which destroy key assumptions of evolutionists. **More great details of this exciting research inside** ( pages 6/7).

## JEHOVAH JIREH TRULY IS OUR PROVIDER!

**ONE DEAD MINISTRY CAR** - two thirds of the way through the 10 weeks of travel downunder for Joseph Hubbard and John Mackay, our car decided to give up! The gearbox went slushy, the temperature skyrocketed, the emergency warning bell rang loud, so we pulled onto a side road at Gosford New South Wales just as the sun set.

**John Mackay**  
International Director of  
Creation Research

Pulling open the bonnet, we were met with a pink goo monster crawling out of the radiator system accompanied by steam and smoke. You're right - it didn't look good! After the NRMA came, they condemned the car to the workshop, and we looked for urgent overnight accommodation. News from the NRMA was not good – the gear oil radiator inside the main radiator had burst, sending water into the gearbox (fatal to gears), plus spewed gear oil into the main radiator and thence through the engine which cooked it into the gluey, goeey, puffing pink monster that just had to escape.

Next day, the Newcastle church for the weekend rescued us, and supplied us with a temporary car as one of the saints was on holidays, so we could complete ministry in both Newcastle and Sydney. BUT our car would require a gearbox rebuild, new radiators of both sorts and several weeks before we could get it back... along with the need for hiring a wagon to carry our books/dvds luggage and selves from Newcastle to Queensland for ministry over the next few weeks.

None of this extra \$5500 cost had been built into our budget estimation for Joseph's trip, but Jesus Christ who is Jehovah Jireh our Provider, always makes sure that our needs are met. What encouragement when one church stepped in and offered to pay all bills for car repairs and hire fees. Another church stepped in and offered us a free wagon when we returned to Queensland, and a friend offered to fly down and drive the ministry car back when it was repaired, which we received safe and sound in mid-September. Thanks to all involved and thank you specially to the Lord Jesus Christ who has promised: *"Whatsoever you shall ask in my name, that will I do, that the Father may be glorified in the Son."* (John 14:13)

**NEW MUSEUM ADVISORY MEMBER** as Emeritus Professor of Biology, Dr Gary Chaing, joins our highly qualified advisory. His PhD was in Neurobiology from the Department of Zoology, University of Toronto. Gary continues to do research in his lab at Ontario's Redeemer University using light microscopy and microsurgery to determine the anatomy of insect neuroendocrine systems.

## OPEN DAY BLESSINGS

**AUSSIE MUSEUM GAIN**

**DR DIANE EAGER**

**OUR LATEST FOSSIL SPECIMEN** went on display at Open Day as fossil finder Texan Joe Taylor (beard) guides Aussie long time helper Garry Watterson, as he puts the giant fossil salamander skull into its Creation Museum display box. Keep praying for a building venue to display our thousands of high quality fossils that demolish evolution... since when have you seen any genuine fossil giant salamanders in a museum? Help us share the fabulous evidence and many rare specimens, showing the Biblical record is right and evolution wrong! Get behind our Creation Museum project with your prayers, your practical financial support and get Creation Research on your church support list and missionary prayer schedule.

### **SHEPHERD NEEDED IN BEAUTIFUL BLUE MOUNTAINS:**

Central Mountains Baptist is looking for an experienced man to take over the work, or a younger man who could be trained to take over.

We have grown despite the general decline of the church in Australia. We are a warm conservative church. Details: [www.mountainsbaptist.com.au](http://www.mountainsbaptist.com.au).

Questions to [wayne.robilliard@gmail.com](mailto:wayne.robilliard@gmail.com)

**ORCHIDS** are amongst the prettiest evidence that God makes all things beautiful in their time, and they provide wonderful examples of just how clever our Creator is, especially in the way they are fertilised. Their relationship to insects is spectacular evidence of the intricate interdependencies of the creation, and marvellous proof it could never evolve step-by-step. Dr Diane Eager not only loves plants (and Jesus), she loves talking on God's design as she shared with crowds at our September Open Day at the Aussie Creation Museum where we have installed a fantastic Orchid garden. Thanks to all who have donated specimens.

**SAVED** It was an emotional testimony as Peter (right) shared in tears with John Mackay, how he had been a rebel against the authority of Christ and his Word, but our previous visit to his area had demolished any confidence he had in man's theories of evolution. So Peter put his trust in Jesus and His Word - by faith, through grace and without works. That's what Creation Research is about. Not just providing proof of creation, nor the possibility a Creator exists – but to introduce people to the Christ who is Creator, Saviour, Lord and God. Pray Peter will continue to grow in Christ and that we will continue to be faithful to the calling of the Lord Jesus.

**PETER**

## SCHOOLS

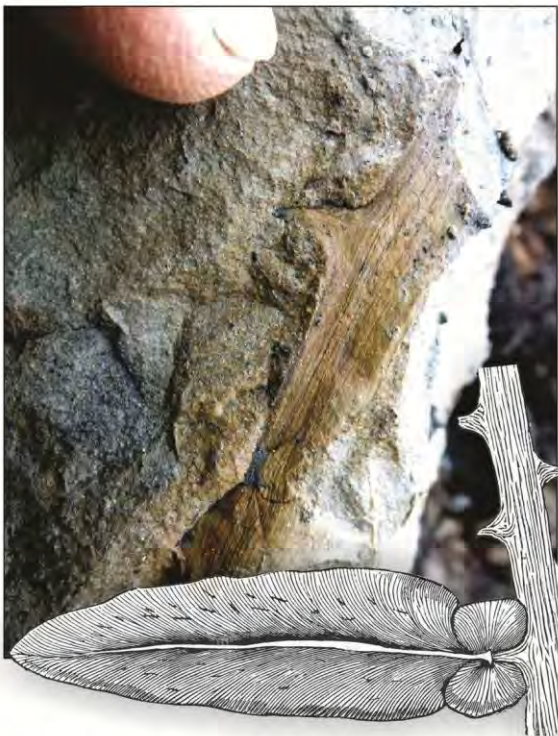

It was great to get Joseph Hubbard into quite a few schools, both high school and primary, as we travelled some 12,000 km from Brisbane to the Red Centre and back. School classes provide great on the ground training as you share the truth of God's Word in what can often be difficult educational environments, which hone your communicating skills to the limit. Joseph did really well, so keep praying for him as we further prepare him for working in State, private, Christian, and homeschooling arenas.

**JOSEPH SENDS** "a huge thank you to all supporters who helped fund my recent trip to Australia, and to all who helped along the way, with encouragement and meeting practical needs. The trip was a huge learning curve, and I have, by the grace of God, gained valuable experience in ministry. It was incredible to spend some 10 weeks with John as my mentor, and learn from him. The trip also introduced me to lots of Aussie geology, giving me masses of practical research experience, which may well lead to new books, new videos, and new Creation Research projects. All of which will be put to good use as I minister back in the UK on campus and in churches and field trips, so please uphold me much prayer and keep watching this space!" God bless, Indiana Joe aka Joseph Hubbard

# THORNY FIRST FIND

**THIS FOSSIL THORN** seems to be another first find blessing as John Mackay and Joseph Hubbard spent a day at one of our famous vertical fossil tree sites at Newcastle NSW. Our discovery seems to be the first fossil thorn found in Newcastle Coal seams (top right) that we can track in any official records.

This was soon followed by a second one (middle left) with an even clearer view of a stem with thorns. The stem structure shows it appears to be a Neuropteris seed fern species, previously not recorded at this site nor any equivalent site Australia wide. Potentially this may even be a new species... see one of our previous Neuropteris finds from Canada (below left) and classic Neuropteris diagram (bottom left).

The significance of these fossil thorns is twofold: 1) they represent a breakthrough for research in Australia, particularly if it's a new species; 2) they represent a kick in the teeth for all theistic evolutionists who argue God used millions of years of evolution to create, then have the audacity to say they believe the Bible as a history of salvation. But the Biblical history of salvation, is a history of real people in real time, with a real problem called sin, in need of a real Saviour Jesus, who died with 'real thorns' on His head, because thorns and sin are related. The first Adam sinned and thorns are one result. The last Adam (Christ) died to deal with all consequences of sin ..thorns included. Real thorns did not come onto this planet until after man was created, so theistic evolutionists spit in the face of the Creator Christ with their man honouring theories.

There are certain things we notice when we present this material – we bring down the wrath of geologists and old earthers, not because we've been the first to find fossil thorns in Australia, but because the rocks are listed as 255 million years old. These thorns not only challenge that, but worse they expose the authority that evolutionists, geologists and old earthers rarely confess they submit to.

We have noticed over and over again, that geologists don't care how old the rocks are! They have changed the age of strata around the planet many times, including coal bearing rocks. So I repeat: they don't care how

old the rocks are - they only care how old the rocks aren't! That's why the official definition of a fossil states it "must be older than 10,000 years". Why 10,000? Because even the most lenient sceptic knows you're hard pushed to get any more than 10,000 years in Biblical chronologies from Adam to the present, even if you stretch credulity with claimed gaps. So any date for a rock is OK, except those that fit the Biblical record given to man by the One Holy and Righteous Creator God. The thorns really are a proof that the coal bearing rocks of Newcastle Australia are not more than 200 million years old, but less than 6000 years.

**These finds are a breakthrough not only for Creation Research, but for Biblical scholarship around the planet. All of which makes us the only museum to have fossils on display. Get behind this museum project now with your prayers and practical support .**

# MUSEUM UPDATES WORLDWIDE

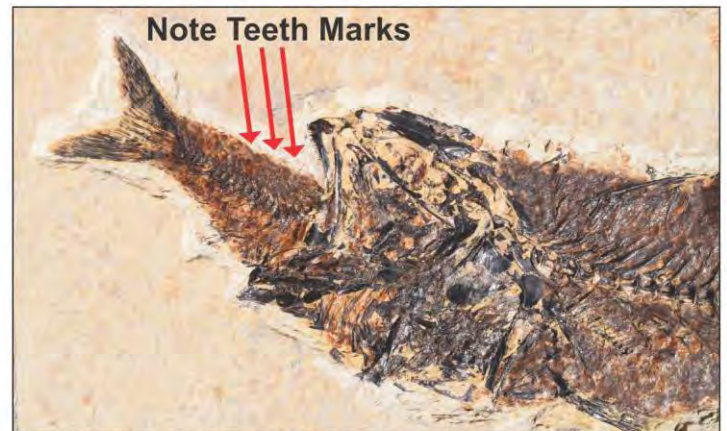

## TASSIE MUSEUM

**CRAIG HAWKINS** (left) demonstrates a mini version of our stalactite machine invention, showing how rapidly stalactites grew from January to July 2018, when John Mackay and Joseph Hubbard visited the Tasmanian Creation Discovery Centre. Our stalactite machines have been an eye-opener to many, exposing one of the biggest lies the devil has put in most people's heads, i.e. given long enough anything can happen - caves, stalactites and even life itself. None of these things happen because of time. They just take a right process! The Lord Jesus could make life, the Universe and everything else in 6 days, because He alone had the right process.

**VOMITING NOT EATING!** The fossil fish (right) was recently donated to our UK Genesis Museum of Creation Research. What a great gift and thank you again. But surprise, surprise – the normal story about fish fossils like this is that big fish was swallowing little fish, and didn't have time to let go before both were fossilised.

But increasingly the evidence is showing the opposite. Both fish in this specimen certainly were very quickly buried, but in this case little fish in the mouth had starting to be eaten. Look carefully at the larger photo to see big fish's bite marks halfway along little fish. It is being pushed out - vomited! We predict the majority of specimens of such fossil fish with food in their mouths, or fossilised creatures "giving birth", will prove to have done so as a result of being squashed. All of which is even better evidence for rapid burial. Keep up such wonderful donations of spectacular fossils.

## AUSSIE MUSEUM

We found the odd fossil (left) west of Alice Springs Airport, as we took a quick four wheel drive trip (bottom left) for the few hours wait before our plane departed for Victoria. Stromatolites are a real smack in the teeth for evolution, as they are not only regarded as one of the oldest fossils on the planet, they are still alive and looking totally unevolved. The explanation is simple.. they have produced their own kind just as God said all creatures would. Thank you Jesus for the wonderful specimens you enable us to collect, even on "fill in the time we are waiting" Field Trips.

## WEST OF ALICE

**Our Museum Goal is to have a system of smaller regional creation museums across the globe, particularly in countries where the funding base is insufficient to support large tourist type museums. Thank you for your encouraging support.**

# MUSEUM UPDATES WORLDWIDE

Martin Legemaate

We held our first 'museum birthday tour' since the Ontario Creation Research Museum building was renovated. Starting with an opening introduction to fossils, then a guided tour and a competition where people searched for answers in the displays. A fantastic trilobite prize was given to the person who was first with all the correct answers, then it was time for birthday cake and a grand finale fossil hunt (right).

Martin Legemaate (above) led a June fossil trip to Norland Quarry. Fossil trips are always popular, and thanks to the Lord for answering prayers and providing fantastic sites. This hands on way to learn about fossils, creation and the flood enables people to easily see that evidence for evolution is found only in the minds of men! God's handiwork is every where and yes, everyone gets to take home as many fossils as they can find!

CEPHALOPOD

Between museum tours and fossil trips we were busy with research in quarries around Southern Ontario. A cephalopod (squid like - with a straight shell) was found with decorative markings still intact! Now that's both rare and quick burial!

GIANT ISOTELUS TRILOBITE

More specimens for our museum such as a Giant Isotelus trilobite (left) were found at St. Marys Quarry Bowmanville, plus a hard to get cross section of a sandstone pillar held by supporter Peter (extreme left). Sandstone pillars are formed as a result of compaction and dewatering of sediment after events such as the flood of Noah's day.

# EXCITING STRATA RESULTS

Responses to our strata machine experiments range from “Frankly amazing!” (Professor Andy McIntosh), to “You need to *'expletive'* your *'expletive'* mouth on your *'expletive'* stupid anti-scientific experiments”. We have stated many times, the key fallacy in reading millions of years from rock layers is the belief that the bottom layer got there first, so any creatures found in that layer lived and died long before the ones in the top, therefore any differences in the creatures are due to millions of years of evolution. The simple observation recorded below, that rock layers form sideways, demolishes the whole basis of evolution, so don't expect our experiments to be all that popular, but they are key to demolishing theistic and atheistic evolution. Enjoy this update and get behind these experiments with your prayers and support.

God's Word tells us to: “*Prove all things; hold fast that which is good.*” (1 Thessalonians 5:21) This applies to all areas of life...morality, politics, science, etc. So it's one thing to use our strata machine to mimic layer formation in the rocks, but is there a way to prove this is exactly how rock layers form? This new series of experiments is designed to answer that! Enjoy the results below from the tests I organised 1/10/18 at Jurassic Ark. Also be thankful for the often ignored pioneer works of Johannes Walther 1893 and French Sedimentologist Guy Berthault.

*In Him Who made all things well, John Mackay.*

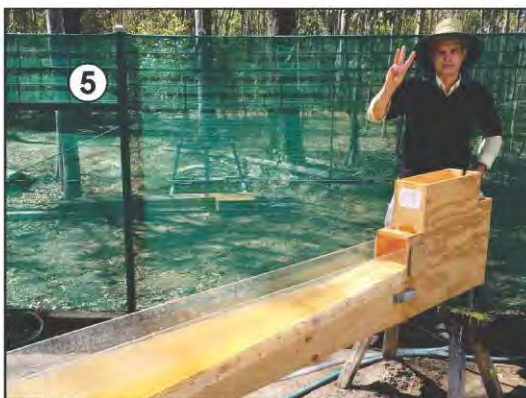

**WHAT DID WE DO?** We took an already existing finely layered sedimentary rock, crushed it, then ran it through our strata machine to see if we could 'put it back together again'.

We discovered a suitable fine layered (laminated) rock just below a minor coal seam in Jurassic Rocks of the Myrtle Creek Formation at Jurassic Ark.

In this excavation (left 1) just under the 2 to 3cm thick dark coal band, there are a series of highly laminated strata – mostly dull white clay alternating with black carbon rich layers... zebra rock appearance. No cementing had occurred, so it is very soft and breaks up quickly upon exposure to air, sun and water.

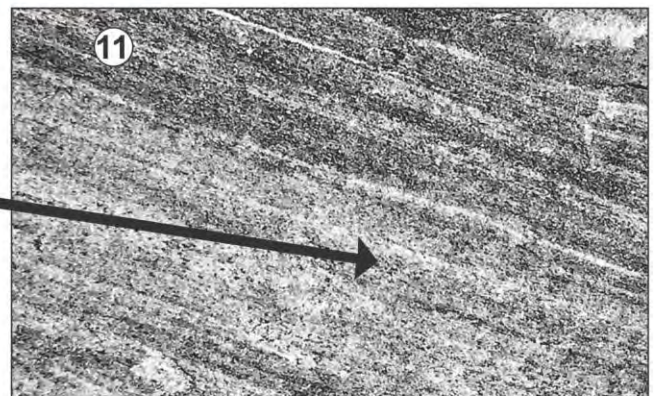

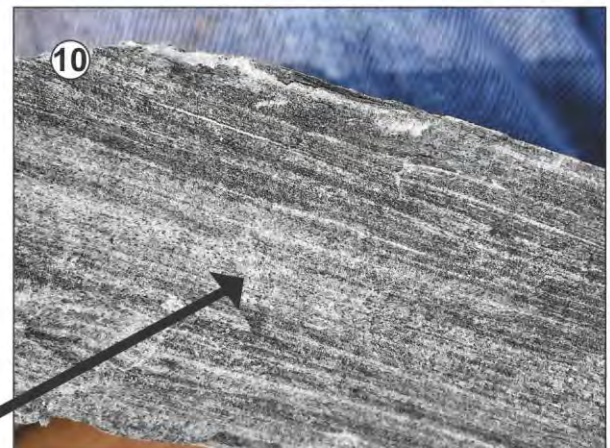

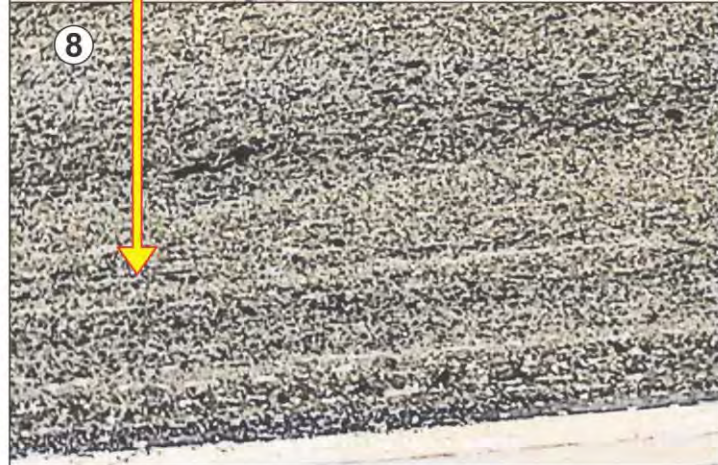

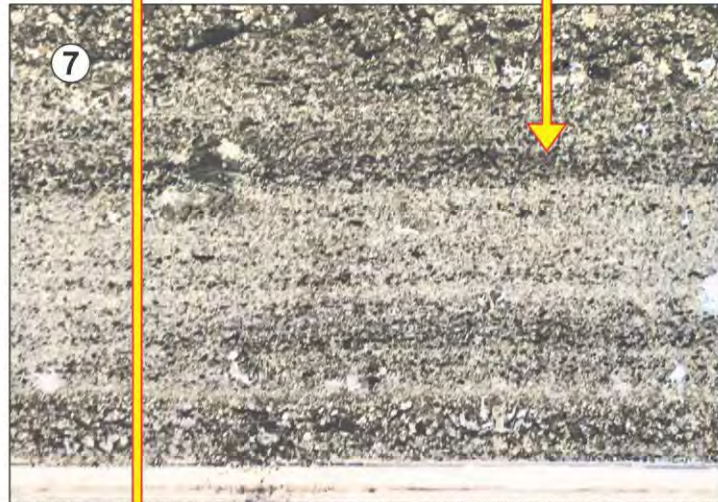

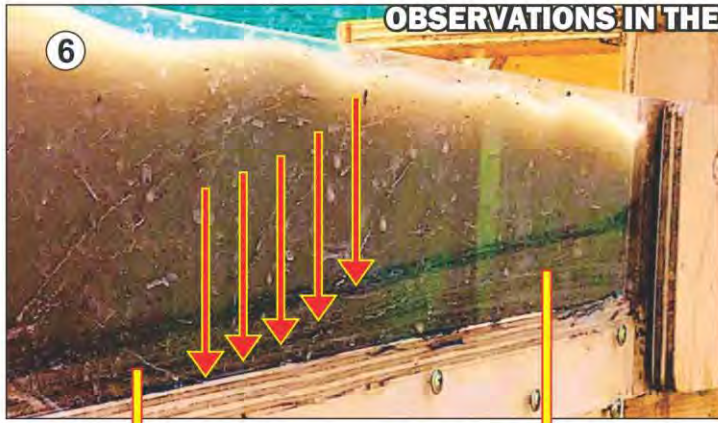

From there:

- 1) we collected rock specimens (left 2).
- 2) we crushed the specimens (below 3).
- 3) we sieved to remove all coarse uncrushed rock (below 4).
- 4) we placed the crushed material into our strata machine tub with water, turned on a constant water flow through the venturi pump, and watched. Clem Grieger signs trial three (below 5) and Daryl Brenton shovels crushed rock for sieving.

# EXCITING PRODUCT SUCCESS

KIDS & ADULTS

witness  
tees

TEENS & ADULTS

**WITNESS TEES** AVAILABLE TEENS TO ADULT SIZES Small to XXXLarge. KIDS SIZES 8, 10, 12 & 14 generous comfit sizing, black only.

**60 YEAR OLD BLESSED** us with her request for our Witness T-shirt "Stop following me we are not related." So we asked her why she wanted one. Her reply thrilled us – "It's time I took a stand." That's a challenge for all of us in a world where even Kindy Kids are being brainwashed and degendered with evolution. It's time to get your T-shirts from [www.creationresearch.net](http://www.creationresearch.net) click SHOP. Take a stand for the Creator Christ today.

VANCE NELSON AT JURASSIC ARK

STALACTITE MACHINE

Vance features in our Darwin on the Rocks DVDs and is continuing his research on rapid stalactite and cave formation. He has authored several important books which are available from our web site Dire Dragons, Flood Fossils and Monumental Monsters.

## OUR 5 NEW KIDS BOOKS Blessings abound!

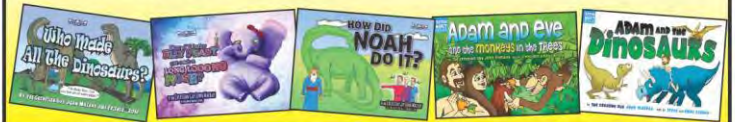

He's a real kid who was really intrigued and totally unaware we took this pic, because he was so immersed in our children's book "Adam and the Dinosaurs".

Our kids books are getting rave reviews from parents as well as from

kids. One mother shared: "I looked and looked and looked but found nothing I could give to my kindy kids about God making dinosaurs. Now I can and they are wonderful."

One grandma told us "I read the 'Who made the Dinosaurs' to my grandkids and they were really impressed, because I could say the dinosaur names. Thank you, thank you!"

A mum told us "I gave them to my non Christian friends kindy kids and they loved them!"
