

PRAISE TO THE LORD, THE ALMIGHTY, THE KING OF CREATION

NEW KEN HAM JOHN MACKAY DVD NOW AVAILABLE!

GROUND BREAKING, REVEALING, FASCINATING, CHALLENGING

are the words which best describe the new DVD, filmed at the Creation Museum in Kentucky featuring John Mackay and Ken Ham as they show and discuss "The Museum, The Ark, The Evidence, The Results, The Opposition, The Victories, The Blessings, The Future." Order yours today and praise the Lord Jesus with us for this new joint project.

A WORD FROM THE DIRECTOR

Can we ever stop praising the God who died for us sinners and whose blessings upon us are abundant in the midst of troubles or success. Make sure you pray for the new DVD with Ken Ham and myself which will encourage many mightily and discourage the enemies of the gospel as well. Pray also for the ministry time Ken and I will spend together in September, and many thanks for your continuing support.

John Mackay
International Director of
Creation Research

NEEDED

New Data Projector.

On our recent trip to Victoria, our ageing data projector died. Checking the bulb, that wasn't the problem and sadly the truth is that fixing them these days is hardly worth the effort as new ones are not much more than the cost of repairs.

COST \$1500 to \$2000

Paper Muncher.

Yes we remember the promise made about how computers would mean paper free offices, but the truth has been the opposite, and after many years of hard munching our paper shredder has been repaired 3 times and it's time to replace.

COST \$1500 to \$2000

OUR REAL JURASSIC DRAGON

Guanlong Wucaii's skelton (right) was installed at our Jurassic Ark project in June and is now joined by a great Mural (above) showing the flood waters just about to entomb him in mud and a huge log debris pile. Guanlong is Chinese for crested dragon, and he makes a great teaching tool at our Jurassic Ark fossil log jam and the kids love it. Despite the fact that he is often shown with purple feathers, we have checked the original finds and can discern no real evidence Guanlong or any other dinosaur had feathers. As we said to our artist who did the mural... science is an art form where theory often drives the facts, and in this case the evolutionist fantasy that birds had to evolve from dinosaurs overrides the obvious lack of feathers on any dinosaur. Lots of school kids get to see the new mural and Guanlong skeleton during August. Support this fabulous outdoor creation museum.

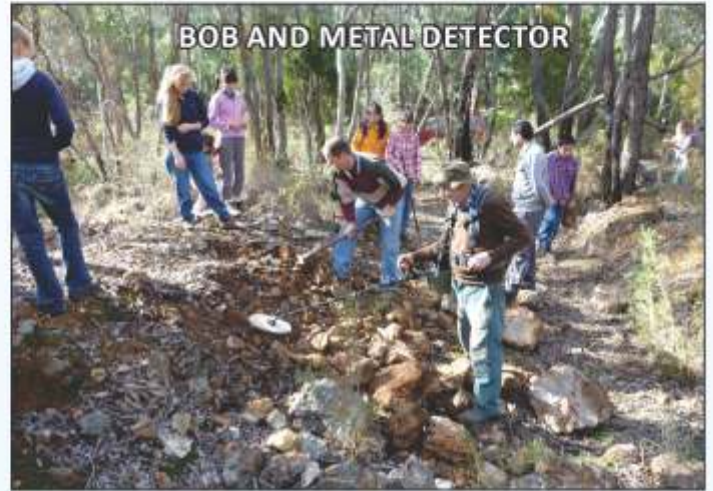

KEN HAM AND JOHN MACKAY BROWNS PLAINS PRESBYTERIAN SEPTEMBER 1ST DON'T MISS IT.

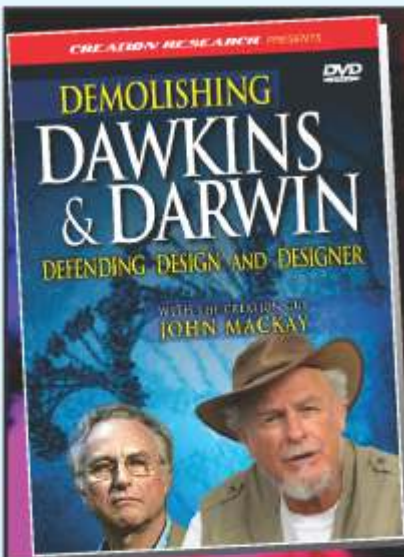

GOLD STRIKE as 16yr old Anna was the successful finder of real gold on our July Castlemaine Field trip.

What an opportunity to share with the field trippers on that day the value of the gold that God made that Adam could find just outside Eden (see Gen 2:8-12). Adam didn't need it to be wealthy, since God had given him everything on the planet. Don't be surprised God reinforces the point by using gold as a paving stone in the new Jerusalem (see Revelation 21). Great teaching tool on what has eternal value. Thanks to Bob Wilmer and John McKay pictured (yes there are more of us) who used their talents and time to help out on Creation Research Field Trips.

GUESS WHO? Rare pic of Anne Mackay (right above) sharing a tent outreach event. Anne is one of those who does a lot behind the scenes and yet usually manages to avoid being 'snapped'. Pray for the many people who make this ministry possible.

FASCINATING FAST FOSSIL FIND - We have many experiments on the go at the moment with fossils, and one of particular interest. We have often wondered why ancient Roman concrete has lasted so well. We have come across one ancient recipe which includes putting plants rich in silica into the mix, such as horse tail rushes shown below. The recipe included the comments that within a few months, such plants petrify, which would mean ancient Roman buildings lasted so well because they were using organically reinforced concrete. Your generous support is appreciated.

Don't miss the latest DVD from Creation Research on how to demolish the foolish evolutionist schemes of men and proclaim the truth of Christ as Creator and Redeemer.

NEEDED

1 good spray painter.

To make our travelling Fossil Trailer look really attractive.

Contact Anne on 07 32064467

Or email info@creationresearch.net

If you want a field trip in your area, contact us. You arrange the crowd, we'll arrange the trip.

See pictures below for school buses, public trips, new finds, and group effort from kids and adults in reconstructing the Gympie fossil pine trees to be re-erected in our living fossil gardens. Jurassic Ark is a project that is unique on the planet and needs your continuing prayer and financial support.

Germany continues to provide evidence as we gain a unique specimen of an Aussie fossil pine branch buried with a deep sea nautilus type shell (bottom right), which we got from the original rocks of the Jura in southern Germany. John Mackay and David Keep will be back there later in the year to do 2 weeks teaching as well as research, so pray we will find even better samples of flood deposited fossils for use at our teaching museum, as well as reach out to a very sceptical German population. Why the picture of a fat worm (above left)? Because it took four years to establish the worm population in our sandy soil, so the plants could really grow. A reminder of how life can't evolve step by step. The worms need plants but the plants must have worms also.

HOW TO VISIT OUR JURASSIC ARK OUTDOOR MUSEUM? Access is by organised field trips so you can (1) Watch for trips we are organising and join or (2) Ask about a field trip where you organise the group and we'll organise the guide or (3) Join a work day and earn your entry by volunteering your time.

We looked out the airplane window and hoped the white stuff on the mountains of NZ was salt. The folks at Timaru (South Island) had asked for a fossil finding trip. Bad news ...the white stuff wasn't salt ...and a cold day loomed for all our walkers ...and the digging helped keep the 120 of us warm as we learned how much God's world has degenerated since Adam went naked in the garden of Eden. And no ... Adam would not have found any fossils in the rocks of Eden either.

A good dig later and look what was appearing ... sea shell fossils and many were showing evidence of rapid death and burial ... they were fossil clams ... and closed. Normally clams die and open up like the one we found on the beach near Auckland. But if they are buried rapidly, they stay shut. No vast time scale in this fossil bed and no evidence of evolution either. Even the school students recognised the seashells for what they were....evidence that God told the truth when He ordered the creatures to produce after their kind.

FIELD TRIP ADELAIDE

WOW and what a July day we had in Adelaide as we learned about recognizing God's creation in the morning, and then went to the well laid out Adelaide museum in the afternoon. Not only did the families pictured get to see lots of fossils, minerals and aboriginal items, but we all learned how to distinguish between real facts and what is just a popular story such as evolution. The simplest method was to ask the question ... did anybody observe this? The most obvious "fictions" were the fossils listed as hundreds of millions of years old, but some were a lot more subtle. The whole day fitted really well with our Biblical aim to encourage God's people to take the advice in 1 Thessalonians 5:21 to test all things and only keep the things that are true.

It was also pleasing to notice that the geologists are more and more relying on catastrophes to explain well preserved fossils, but only little floods got a mention and not Noah's flood at all. We are making headway, as in their stories about how trees got opalised ... Australian pine tree washed out to sea and then water logged etc. No help to evolution since the Kauri pine trees are still here and flooding millions of logs out to sea is quite a flood-based catastrophic event. Thanks to the Museum for their guide sheets and self guided museum trails and the old stables to meet in after.

If you want a field trip in your area, contact us. You arrange the crowd, we'll arrange the trip.

NEW LIQUID FOSSIL DISPLAY SUCCESS

Sinclair has long been a fixture on American roads with its dinosaur logo and mascot - an Apatosaurus (Brontosaurus).

What better fitting gasoline brand is there to show the correlation between dinosaurs and gasoline, a "fossil fuel" derived from plant and animal matter?

Of course Sinclair could never resist having to say it took millions of years, when not even oil spills take even 10's of years to be degraded naturally. Unless you buried the dino's quickly you would get no oil at all and a flood is the best way to do this.

Pray for Martin Legemaate (below left) as he outreaches for Christ in Ontario through a great museum.

THANKS MARTIN, "I just want to take this opportunity to thank you again for your work. I was grateful to be a part of the field trip experience. It was a good time of learning for me. Thank you for your work and I trust God will continue to bless you and your family in the days ahead." **Geoff Guch.**

HI MARTIN, "I just wanted to thank you for all your hard work in organizing the field trip. We really enjoyed our day! Always enjoy hearing the knowledge God has imparted to you, Vance, John Mackay and others. It's a great way to confirm to our children that we have an awesome God and Creator. We will be praying for you as you continue to develop the museum and begin doing field trips." **Marlene.**

AFRICAN AMERICAN SAILOR BLESSED

This young African American in the US Navy is thrilled with the ministry of Creation Research because of the blessing it's heaped upon him. We've been praying for Darien now for years and it's great to keep in touch with him as he shifts around the world, so we finally asked him to send us

a picture so you can share the joy he does.

Darien writes: "Hello John,

The Lord God has used you in such a way that you couldn't even imagine. A Scottish Aussie helping a young African American although they've never seen each other.

I found myself recently listening to your messages whenever I feel the conviction from the Holy Spirit and I drop to my knees. Who would've thought that you would be one of the most influential people in my life and I still don't know you, but very much want the opportunity to meet you given the right timing.

Thank you, thank you, thank you! To God be the glory! I will continue to pray and support your ministry. Never stop doing what you're doing as it is encouraging for a "young bloke" like me to see you as one of the few men to help me chart the course of true masculinity." **Darien Durr.**

USA READER WRITES: Thank you for your faithfulness to the Lord Jesus and proclaiming the gospel so clearly. Your ministry and family are consistently in my prayers." Much Love Brother, **Tom Barnhart.**

QUEENSLANDER SAYS "It was great to see a photo of John and Ken together again in the Creation News. It takes me back to the wonderful times we had when you came to Gladstone in the early days of your ministry. One time with Dr Clifford Wilson. Your research has gone ahead in leaps and bounds yet there are things that haven't changed: The truth of God's Word and Satan's lies and deceit. I thank God for your ministry of showing the truth of God's Word and exposing the lies of Satan. What a terrible, terrible shock awaits Dawkins and his ilk when they pass through that doorway called death and find that all they have believed in was a lie. I pray God will grant them repentance." **Searle & Adele Jones, Gladstone.**

CABOOLTURE BLESSINGS "We attended 2 meetings with John Mackay from Creation Research. We were thoroughly impressed by John's strong, biblical and uncompromising message. He presented the facts in a very easy to understand format and his information was not only logical, but captivating. This ministry not only educates but equips people to go and share the gospel, having great confidence in the Word of God. We wholeheartedly encourage everyone to support this valuable ministry." **Sharon and Manfred Wagstaff.**

UK ENCOURAGEMENT SOUTHAMPTON UNI MEETINGS: I am a fully qualified Physiotherapist and struggled for many years to accept the Bible as authoritative as I couldn't accept the first few chapters of Genesis as fact. I heard John speak at Southampton University in England and thought he was excellent. Thanks to your work my faith has been strengthened and I have a real passion to evangelise to the lost who have been deceived into accepting evolution as fact when it is really a faith! So I thank the Lord Jesus Christ for ministries like yours and encourage you to keep going as God deserves the credit and praise for His wonderful creation! I pray for all of God's blessings and protection on you and your team as you travel the world bringing the power and truth of the Good News to people. I receive all your email updates including your prayer news and evidence news. Brilliant stuff! All the best, **Tom Robinson.**

AUSSIE DEBATE CONGRATULATIONS from Steven Harrison who writes: I must confess that I nearly fell off my chair when reading the local newspaper recently, when I saw your picture and the adjacent article detailing your debate with Ian Bryce in Tenterfield. My heartiest congratulations to you, sir! A job well done. May our Lord Christ Jesus bless and be with you, giving you the victory over the powers of darkness and confusion, and keeping in health and happiness.

NIELS ANDERSEN SHARES: "Your ministry has been a tremendous blessing to our family. We thank the Lord for you every time we hear the word "evolution" (that would be almost daily). It is my hope that you will be able to continue to do the Lord's work for many years to come."

YOUR FLOOD CD: "I listened to the CD in the car on the way home yesterday and thank you for your research, knowledge, and prophetic wisdom and I thank God for gifting you with these things. Blessings always in our Lord Jesus." **Peter.**

KIWIS Ronald & Anna Clearwater share: "We went to the teaching sessions and the field trip John Mackay ran in Timaru, NZ recently and they were absolutely fascinating! I have a Bachelor of Science but I have never been challenged to think and to question the way John made us think (that's a bit scary when you think about it!). Keep up the great work!
