

DO YOU KNOW THIS MAN?

One benefit of recent ministry and research in Germany has been to get to where Neanderthal Man comes from and discover the museums display him as a rugged up person who is indistinguishable from the average German in Dusseldorf, which is the major town not far from where poet Joachim Neander escaped to a little "dale" to write his poems. The dale was eventually named after him as Neander's Dale or in German Neanderthal.

It is interesting to note that Neander's most famous poem is "Praise to the Lord the Almighty the King of Creation." As for Neanderthal being a missing link...well that link has gone totally missing! Neanderthal is one of us - a descendant of Adam! So now let us together praise the Lord the Almighty the King of Creation.

"Share the good news from Creation Research. And start'em young eh?"

CONFERENCE 2014

Together for Truth • UKMega.org

SEPTEMBER 2014 BIRMINGHAM UK..Don't miss it.

A WORD FROM THE DIRECTOR

Jesus said "I say unto you, Whosoever shall not receive the kingdom of God as a little child shall in no way enter in." Luke 18:17

A little child read Genesis 1 aloud to the audience. When asked what it meant she replied; "God made everything in six days." No hesitation! No query about days really meaning days and not even a question on whether information was missing between verses 1 and 2. Just a childlike faith the Bible said what it meant and meant what it said. Is that how you read God's Word? Childlike ... as a little child? Do you read it as one who knows their master is far more knowledgeable than we are? Do you truly trust the author and finisher of our faith?

After many decades of debates with those who scorn God's Word outside and inside the Church, and watching people trying to enter God's Kingdom on adult terms with God the Creator, we warn you to beware! When God's Spirit led the aging apostle John to declare much of Revelation a mystery, believe it!

When God's spirit (the same Lord) led the prophet to write we would never be able to search out the foundations of the deep, then reject any theory of men that claims otherwise. When the eternal God and Saviour revealed the rest was given to us and our children forever, accept it and read all of God's Word with a willing childlike heart and mind, ready to trust and obey the Lord Jesus in all things. Then pray for us at the forefront of this battle whose Lord and Saviour is mocked privately and publicly, especially for what He did at creation, so they can foolishly reject His offer of free salvation, and deny His power as coming judge. Join us with help where you are able.

INDIA TRIP sees John Mackay in several schools and Universities for the first time. The organisers told me that evolution is becoming a bigger problem here than ever as education spreads to the masses. God's existence is never really questioned in this area as Hindus dominate, but since they have millions of gods, it is vital to share with them the only true God who is the Creator Christ, and that's where evangelism of Hindus must start.

Our first public meeting in a lecture theatre was packed for a 4 hr seminar. English was not a problem even though Australian slang was, so exclusively Aussie words had to go apart from boomerang, kangaroo and the cricketers 'ousat!' The news over here was full of Sachin Tendulkas retiring from world class cricket. Yet the signboards revealed an interesting attitude to religion with adoration of Sachin on huge bill boards with words under his picture proclaiming Sundhir's God is retiring. His devotion should not.

Pray for us as we assist outreach in India in this way.

CANADA MUSEUM BLESSING - Martin Legemaate (below) has made great progress with our fossil museum with new displays below as he tackles just how to show that the rocks cry out the praises of Jesus the Creator, even though foolish men applaud Darwin and Dawkins. Pray for Martin as he collects this material, mostly in Ontario and leads field trips in that province. Now we can also praise God as Martin has high school doors opening to him.

Photo (below) shows Martin out in field in Ontario collecting for the Museum. Pray much for this faithful man and his family.

Martin writes: "The Lord seems to be widening the influence of our Ontario Museum's creation and catastrophe message with the first ever museum public school tour which started in Spring. During October I had an opportunity to speak at a local public high school to a group of students for 3 sessions. The power point presentation was called, "The History of the Theory of Evolution, What Went Wrong?"

The student led group that sponsored Martin is called G.A.S.P. (God and Student Partnership). 14 student packets consisting of Creation Research Evidence brochures, DVDs and CDs were taken by students interested in knowing more. Pray for bold student groups such as G.A.S.P. as they try to navigate through an evolutionary saturated environment. Support Creation Research as materials are provided free to the public forums. It's a small start but a great open door for Martin in secular schools. Pray for him and this ministry in Canada, and throw your prayer and financial support behind all of our school ministry.

UK SCHOOL MINISTRY blessing as 300 6th and 5th form High School Students got to hear the evidence of Creation and Creator. Question time was great with the first student challenging me with "You biasedly presented only evidence favouring creation". So I then asked him to share the evidence I had omitted that showed evolution. The 5 minutes of silence that followed as he looked blankly to his fellows for help was almost embarrassing ..but a great victory for Jesus. And no we don't hold back on telling students about the Creator ...we just need wisdom to figure out how to do it within the curriculum. So pray the Lord will continue to give us biographical quotes from many scientists about their own faith and the role it played in their research, so we have launching pads to do this from.

SUPPORT OUR MINISTRY TO STUDENTS WORLDWIDE.

Schools and Universities don't finance it, but they need it desperately.

PRAY FOR OUR AUSSIE HELPERS

During this year of ministry young men such as Edward Brown have offered to help drive John Mackay around on ministry and research ...this time in western Victoria. Ed and John are shown at Pyramid mountain where we ran a field trip for some homeschoolers. Such help makes our ministry much more effective.

COME IN FROM THE COLD was the aim as Dr. Peter Mikula made his telescope available at the Kalgoorlie Creation Research night meetings to attract outsiders in. They got a great free view of Saturn and Jupiter as well as their free invite into the meetings in the Mining Hall.

We really appreciate people willing to go out in the cold for Jesus sake. So pray for all these volunteers which make our meetings a real success.

NEW MSc HELPER as Phil Mott (right) who has a MSc in Astro Physics joins our UK team.

Phil is shown with one of our keen pastoral supporters Adrian Vaughan (mid pic) where Phil got a great opportunity at 3 days of meetings with Adrian's Church to share Jesus as Creator and Saviour and answer questions about what's wrong with the big bang theory, etc. Pray for these young men we need to nurture in this ministry. Phil has already started to help with evolutionists' questions about astronomy and distant starlight, etc. on the askjohnmackay.com site. Pray for him.

Chip is his name and we caught up with him earlier this year and rejoice in the fact he is still going on with Christ. His testimony to us was: "You don't know me but 8 years ago I came to your meeting as an unbelieving evolutionist. Your message smashed my confidence in evolution. And you suggested I get Unlocking the Mysteries and God used that book to build up my confidence in His truth and then I began to believe and then the Pastor here led me to Jesus and I got saved and then got baptised on the 10/10/10. Praise the Lord what a joy!" Keep praying for results that last for eternity.

BROWNS PLAINS BLESSINGS

As Ken Ham and John Mackay (photo left) teamed up again for a great day of meetings with a great crowd. Ken's mum (pictured) was there and really thrilled with the day at Browns Plains Presbyterian. Pray for continuing meetings of this sort around Australia and the world.

Thanks to all of you who have faithfully supported us over the years. The Lord Jesus does hear and answer prayer.

JURASSIC RESEARCH

David Keep (above) and John Mackay spent 10 days digging and preaching in southern Germany where the original Jurassic Rocks were studied, which our rocks at the Jurassic Ark Museum are named after.

It's the area where the feathered Archaeopteryx was found and so our research is doubly vital. Not just to collect specimens for our Australian Creation Museum but the specimens below we brought home from this area (Jelly Fish and Cuttle fish mixed with flying creatures and Aussie Fossil Pine tree) show the whole area is a flood deposit, (land and sea creatures together) as is our Australian site. Thank you for your help in supporting the cost of this research. It is vital that the fiction the rocks took millions of years to be deposited, which leads so many astray from God's Word, needs to be exposed for the lie it is. Keep up your financial and prayer support.

FIRST EVER GERMAN FIELD TRIP

Our many research digs in Germany since 2006, have now made it possible for us to hold our first ever field trip for the German public. It was a great success. Language problems were few and teens, parents and children alike had a great, even though cold day, out in the rocks of the original Jura area. These are now known as Jurassic, but the word Jura can be first read in print in Julius Caesar's writings as his conquering military entering the heavily wooded southern Germany, adopted the local tribal word meaning wooded ..Jor.

SCHOOL FIELD TRIP BLESSINGS

As Dr Diane Eager shows students at our Gympie Jurassic Ark site how to 'restore' fossil trees to full glory...or should that be glue...ry. A hard lesson to learn in fossil reconstruction is just how much glue it takes to put a dinosaur back together. Continue to pray for our work with students on field trips worldwide. It's a very unique aspect of Creation Research and a great way to break down barriers teenage students have to the Gospel of Jesus and the truth of His word.

POLYSTRATE FIND

One field trip to the Stuttgart (Germany) area resulted in a great specimen (above) of a belemnite (squid) found at an angle to the strata it is buried in, meaning it did not die and fall to the bottom to slowly be covered up. The yellow lines show the difference in angles. Additional proof of its rapid flood based demise came with the finding of coalified pine trees in the same layer, buried with sea shells embedded in the coally wood (below). The temperature on the trip was around 2 degrees so thank you for your prayers for our safety and health.

VICTORIAN HIGH SCHOOLERS

Students from Ballarat gain real field experience as they debate with each other about how quickly the rock layers at this site formed. Key to evolution is the concept that sedimentary layers represent vast ages and so you can dismiss the six days of creation out of hand. After prolonged debate, the students are informed that the layers here did not exist until the gold rushes, and represent only 50 years of outflow from one mine. The strata were not formed by time, but by a process, and the more efficient the process, the less time was taken. The same is true with natural layers. Ignore Noah's flood and you try to explain everything with long slow anti Biblical time scale ...not because of the evidence but because of prejudice. Pray with us as we push back the 'layers of mythical time' used by high schools and universities and museums to stop people trusting God's Word.

UNUSUAL FOSSILS

Students found some great and seemingly now extinct Graptolite fossils during the day. Graptolites seem to have been some kind of floating corals and were first described as 'pencil' (grap. as in graphite) and 'tol' (a connector) and 'ite' (thing).

The good news is they are no use to the evolutionists as extinction is the opposite of evolution, and they are remarkable evidence that we once had more life forms than we do now. Perhaps they still exist in the deep oceans of the world? Support our work with students as we encourage them to check out the evidence because the God of the Bible does not expect them to believe something in order to pretend its true. He expects them to believe He is Creator because it is true.

AUSSIE CREATION MUSEUM PROJECT NEEDS\$ YOUR \$UPPORT. WEB GIVE via www.creationresearch.net click DONATIONS or mail gifts to addresses on back page.

WINCHESTERITE Betty Vivian shares: "A very big thank you for coming to Winchester. I appreciate you are a target for Satan, so pray about this in particular. However it rejoices my heart to see how efficiently you put him to flight! May the Lord richly reward you, your family, personal friends and colleagues for all you do for His Kingdom.

SKEPTICS LOSE as the Winchester Doubters turned up en masse to our public meeting in the town hall and became so obnoxious that even the audience started shouting for them to "shut up". But God is greater than all human doubts. As Brian Gale writes; "One chap, who came to Winchester, just to bring the family, came away a convinced creationist!" PTL with us and pray that this man will also become a servant of Christ the Creator.

NEW ZEALAND BLESSING: "Hi John, just over 10 years ago I brought your CD series "the Creation Of Love and Marriage." I've just been listening to it again (being married for over 2 years) and have to agree with the Word you preach as I did when I was single.

I was one wanting to stay single, but it was not God's will and He showed the way via the way I met my wife.. to the point I had to CHOOSE to love her, not fall in love.

Amazing story how we met, and now I'm falling in love more and more with her, knowing that without CHOICE, there is no CHANCE to have marriage succeed. God bless you brother. **Andy and Nene Mackay**. PS The Lord gave us a son 8 months ago.

YOU TOO CAN DOWNLOAD THIS BIBLE TEACHING SERIES FROM OUR WEBSHOP

Heres how www.creationresearch.net click **SHOP**

UK ENCOURAGEMENT from Virginia M. Pattison who writes: "I was at the Calvary Chapel, York presentation on 15th October where John Mackay gave an authoritative and clear message on the folly of Evolution and the truth of Creation ex nihilo and Biblical chronology. What makes his teaching more remarkable is that he helps us focus on the Creator as someone who is walking alongside us, sustaining and revealing Himself in all His wonders, even now. I have been fired up as a believer not just enlightened intellectually.

May God help you continue your good work, be very blessed and protected as you bring this message of life to a cold and hungry land.

HOW IMPORTANT IT IS! "Your ministry is treasured by Pastors like me. When I was a new Christian many years ago, someone introduced me to a newsletter where evidence for Creation and the Bible was shown. Just as evolution erodes confidence in scripture, Creation science enhances confidence in scripture and in the God who wrote them. My faith was lifted and deepened.

Now I am a Pastor and can attest that people have found faith in Christ because of Creation Science. In the churches I have pastored, those who believe in Genesis believe the rest of the Bible and have a greater confidence in God. Evangelism is also strong. I've met ministers who no longer trust Genesis and their churches are emptying because they have eroded their own people's faith. Such ministers even question the gospel itself. I do not have that problem because I was educated by people like you about the God of Creation."

Pastor Mark Glaab, People's Church London Ontario Canada. Ps. You can quote me

NEGATIVE LETTERS

"I find this kind of modern overly-literalist reading of parts of the Bible strange, worrying and unhelpful so I would strongly recommend that others are not brought to this event because it strikes me as something which might bring our faith into disrepute." **Paul Carter**, Methodist preacher in the York Circuit.

"I am sorry to find that you are so misguided." **Revd. Dr. Michael A. Chester** (Methodist church.)

At one Bible College, I was informed prior to starting: "We don't care what the students believe on this issue but we are interested in John Mackay's opinion."

Strange discovery at one Theological College. I had been invited just to prove there actually are people who still believed in 6 day creation „wow ... the devil got us invited so they could mock, and we accepted so they could discover afresh why Jesus should be praised as Lord and Creator and Saviour and Satan the father of the lie of evolution, should be rejected.

PRAY FOR US THROUGH ALL THIS OPPOSITION ...it is your prayers and support that makes this ministry succeed.
