

**UK MINISTRY SUCCESS****UK Conference 1300 people attend**

Thank you all for praying for the UK Creation Conference as 1300 sat under the ministry of Ken Ham, John Mackay (pictured above) Ray Comfort and others at the start of September. The joy of all joys was to have many come to our Creation Research display and share how they had come to Christ through our ministry and how they were still going on and growing in Jesus. Pray for our teaching ministry to the saints and for the coming on the road ministry in the UK including one debate.

John Mackay
International Director of
Creation Research

**A Word From
The Director**

“That they may see, and know, and consider, and understand together, that the hand of the Lord has done this, and the Holy One of Israel has created it.” Isaiah 41:20

Many years ago a young geologist got saved. He had been studying in the jungles of South America and bumped into a missionary who couldn't answer his 'rocky' questions so the missionary cried for help from a USA geologist who already was a Christian, who then got in touch with myself (John Mackay) and asked for help in answering the PhD student's questions. The end result was our DVD "The World of living fossils," travelled via multi country post through three sets of hands into a fourth set belonging to young Roy....Praise Jesus.. Roy became a Christian!

But don't stop rejoicing, Roy ended up in a prestigious university in the UK whereupon he asked me to address the geological association. He shared when students discovered he believed in God, Christ and Creation, they were mystified and asked many questions, so could I come and answer them? When the Lord opens doors it is wise to walk right through them. So I ended addressing the Oxford Geological Association and just before I started, Roy shared today's Bible verse from Isaiah 40:21...that was his and our aim for that vital lecture.

Now several decades later as I begin to spend 5 weeks teaching in a UK which has increasingly become anti Christ, anti God and especially anti Creation under the influence of atheists such as Dawkins and Attenborough, pagans, lesbians and homosexuals, plus liberal church men and politicians, Isa 41:20 will be our theme: **“That they may see, and know, and consider, and understand together, that the hand of the Lord has done this, and the Holy One of Israel has created it.”** Pray with us and for us and for the salvation of souls in the UK and for the Church to be awakened to the truth of God's Word in Christ the Creator and Redeemer.

CAN YOU HELP?

Joseph (left) is a young University Science student who has been able to organise a debate between myself (John Mackay) and a scientist in his UK home town late October, and needs help to pay for venues and advertising etc. He will also be joining John Mackay as an assistant speaker at several youth events he has organised in the UK and at field trips, and wants to be a part of Creation outreach in the UK.

As a student he has no funds and at the moment we have no spare cash either to assist with travel costs advertising etc, but we have told him we will be there. Can you help? If so send gifts to your nearest Creation Research office. We have met with Joseph several times for discussion and prayer and admire his love of Jesus and how he wants to win souls, not arguments. I would encourage all of you to get behind this mightily in Christ.

PRAY FOR ED (above) who has shared with us his calling to minister to youth. Both his family and he feel that Creation Research is the ideal vehicle to reach our current generation, who not only don't know the Bible, but have been totally brainwashed with the lie of evolution. Ed and his family are convinced Creation Research is not just about the science, but it is really about leading people to Jesus. Ed's testimony has been a tremendous encouragement as we have been praying for a young man to join our team. Pray with us concerning Ed's future.

Ed is shown (below left) helping tidy up at Jurassic Ark for the August Open Day accompanied by Des on right. (Thanks guys)

TASSIE OPPOSITION one youth leader reports when he tried to organise his church youth group to come to our Creation Research Seminar near Launceston – he was warned off by Church leadership with: “If he did take their youth to hear us on the evidence the Bible is true, he would lose his job as youth leader!” That is how serious the opposition is in theological circles. Sadly our world is full of theologians and pastors who do not believe the Bible is the Word of God from cover to cover and yet they have high positions in evangelical churches.

ANGLICAN SURPRISE as John preached for Pastor Edrick Banks in Longford on the Sunday morning and was received very well, with some folks saying; “We have never heard anything like it” or; “This is the first time I have ever known there is evidence the Bible is really true from the beginning.” Pray for Anglican Clergy who do hold the Word of God as authoritative in all things.

KIWI TEACHER “BRUCE” SHARES HIS CONVERSION BLESSING *“Ten years ago in the little country town of Taumarunui, I heard you speak on the evidence the Bible was true and that was the first time I had ever heard such a thing, and it gave me confidence to believe the Bible is true. As a result I became a Christian!”*

Pray for 'Bruce' who is now a teacher in the Kiwi education system and in a great position to influence others to serve Christ. This is what the ministry of Creation Research is all about – not just teaching people about the evidence for creation – but the evidence of the Creator, Who He is and how to know Him.

NEW ZEALAND PASTORS' CONFERENCE SUCCESS as John Mackay is shown below with some of the Pastors recently in New Zealand. Pray as we minister to pastors worldwide to teach them the truth of the Word and Works of God in a way they can take it back to their churches to share the Bible's truth from the beginning.

ATHEIST CHALLENGE at John's final July meeting in New Zealand a French Atheist introduced himself as “a biologist and an unbeliever” in everything Christian. He began to quiz John and video record the conversation for his use. The conversation became remarkable. After a short while having his questions answered, he said “I think I have just come a 1% Creationist” – a little later he stated; “I think I am now a 2% Creationist.” When he admitted to becoming 3% convinced, he terminated the interview. Pray for this man. He needs to not be just a 3% creationist, but 100% saved.

“WOW..that's fantastic!” is the commonest comment we are getting to the new Giants' Mural (below) by our Artist Steve Cardno illustrating the violence of sinful rebellion mentioned in Genesis 6 just before Noah's flood. Pray for the 5 artists who take part in the Jurassic Ark Mural project.

MOTORBIKE BONANZA as the Bike club holds its second annual Creation Research Jurassic Ark fundraiser. One of the highlights of the day is the awarding of "Best Bike Prize" so look at the "cool" bike winner and pray for these guys as they find sponsors to fund their rides in order to donate to Jurassic Ark. Join them in 2015.

JELLY FISH FOSSIL (above) made for some great fossil displays for our Jurassic Ark August open day including this great specimen of pre-Cambrian jellyfish we obtained from Michigan USA. Note the fossilised ripple marks are covered with millions of jellyfish. The importance of this fabulous plate in our collection is that since Jellyfish are soft and floppy they don't lie around waiting to be slowly buried, and since there are the enormous number of them (over several hundreds of miles) it cries out a massive flood catastrophe. Your support enables us to get the research done, get expeditions done and get these fossils for a fabulous collection.

EDUCATIONAL TECHNOLOGY BLESSING We have reported over the past two years of school classes who have helped find and excavate a new fossil tree at Jurassic Ark. They have also learned a little about how to make these trees presentable for display. One of these trees has now achieved "on show" quality, and the picture below shows Jurassic Ark helper Karl using his skill to put finishing touches to the log on our specially made "vertical tree helper stand" designed by Fred Dainty. The joy of modern technology is that as Karl was completing the prepping, we snapped the pictures right on our Iphone, then sent them straight to the classroom for the teacher to show the students. The quote came back in a minute .."Awesome!"

Pray for the schools we take to Jurassic Ark and praise the Lord for the joy the students and teachers get from this as they learn about Noah's flood and God's handiwork in Creation.

JURASSIC ARK SUCCESS as our excavator Karl, addresses the umbrellared crowd for our open day (pic below). Karl has done wonderful work this year in exposing many new flood deposited logs at our Jurassic Ark site and is helping make it a world class exhibit of a fossil flood log jam. Each log exposed has provably been buried without branches or roots and each adds more nails in the coffin of the evolutionist mentality that the trees 'lived there, died there, slowly got buried and fossilised there, a concept which was deliberately designed to destroy people's confidence in Noah's flood and the whole Word Of God. Interestingly we haven't had even the most sceptical visitor able to refute the evidence that our fossil flood log jam was anything but a catastrophically deposited, rapidly formed, flood covered massive deposit. Your prayers and support have really made this possible.

ADVANCE NOTICE AUSTRALIA EASTER 2015 JOIN John Mackay for 4 beautiful days in the Aussie country side at Warwick Queensland, while he shares the good news as Jesus did; 'beginning at Moses' (Luke 24:27) with a great trip through God's Word. **DISCOVER EVANGELISM'S MISSING LINK! GENESIS.** MORE DETAILS or book now via davepowell101@gmail.com or phone Australia 0435 998 246

MONTANA MONSTER FINDS

Our Canadian associates Martin Legemaate and Vance Nelson, joined veteran creationist Gary Parker and others for a dino dig to extend the Creation Museum in Alberta. Praise the Lord for these research opportunities. The fossils collected from one layer contained an absolutely mixed jumble of dinosaurs, sharks, starfish, turtles, crocodiles, land plants, water plants and in fact everything you would expect from a massive flood based deposit. Your continued support is necessary for this project.

TASSIE RESEARCH GAINS GREAT FOSSILS. Pray for the team shown below as not only have they been a great blessing in organising Tasmanian ministry for our main office, they have been blessed by being recipients of us great new fossil Scallop (shown). They plan on setting up a Creation Research museum in Tasmania. Pray for the Foley on the left, the Hawkins on the right and John Mackay and

Creation Research as we become patrons to this new project.

LIVING FOSSIL PALM

The fossil palm specimen from Jurassic rocks is one of our latest acquisitions. It has been beautifully polished yet is still obviously visible as a section from the trunk of a palm tree...just turned to stone. For prayer and support ..we are still in need of both the time and money to write up the fossil trailer in such a way that it is most useable for not only carrying the fossils, but for displaying them easily.

DONATE FOSSILS and / or artefacts to our Creation Research museum. NOW'S THE TIME! Contact us on Australia 07 3206 4467 or email info@creationresearch.net

At the Quarry Face

Part of our ministry is teaching students that Jesus told the truth when he stated the rocks cry out the praises of God. This aim is really helped along by local quarry owners who give us permission to take students and public into safe quarry faces so people can actually look inside the Earth. These are a great opportunity to share the things of God in what He made at creation plus what He destroyed during Noah's Flood, plus the evidence God's Word is the real history of the planet Earth. Come along on these digs and learn just how much Satan has deceived man with millions of years and evolution.

INTO THE EARTH'S AND OUT A VOLCANO.

Several days of homeschool field trips during August took us to great exposures showing earth's history where families saw undeniable evidence of the flood based rapid catastrophic build up of massive layers in what are called the Jurassic and Triassic regions of southern Queensland.

Part 2 of the day was to walk through a volcano. The darkness of the rocks made for some fabulous collecting as they were full of gas bubbles that had formed during the melting of the rocks and their expulsion from the earth. Some lovely green crystals of olivine were collected as well as a strange crystallised material not yet identified.

We climbed a steep hill to get there, but all came away with one observation - neither the sediments, nor the volcanic rocks showed any evidence of vast time ...after all volcanoes don't do slow, and neither do flood waters which build up sediment. We have all been lied to about how long rocks take to form and how old earth is. Support us as we minister to the young and young at heart as well as university sceptics who all need to know that God was there in the beginning and He doesn't make up scientific theories, He just tells the truth.

If you want a field trip in your area, contact us. You arrange the crowd, we'll arrange the trip.

TECHNOLOGY BLESSING "My mom-in-law who's Catholic was drawn to your streamed Creation seminar and watched nearly all of your first presentation, which clearly had the Gospel in it. Please pray for fruit! Praise God for this! I put it on the big screen for us all to watch. Praying for you! In Christ," **Noelle**.

US SURGEON SHARES "I love your answers to common subjects like the tattoo article. Your E-Mails inspire me. I am honored to continue to support your ministry." **Dr Sid**.

THANKYOU, THANKYOU, THANKYOU, "Words can not express how grateful we are to your ministry. You continue to impart to us fascinating information about the Divine Creation. Keep up the good work for God's glory. Thanks again." **Robert Javapro** CAP School Coolgardie.

HOMESCHOOLERS CONVINCED "Hi, A word of encouragement, we had a great weekend, the children really like 'the meat'.

We had a lady sitting in front of us who went through all the presentations. She came on Friday to the Homeschooling Day and before she said 'I sat in Church all these years not thinking it was an important issue as if in blinkers and I cannot believe what I have missed' Praise the Lord Jesus Christ, **Ian and Heather Hartley**.

JURASSIC ARK BLESSING "We do thank you both sincerely for your kindness to us during our visit to you on the 17th with Fred and Ian. It was an education and a blessing to experience your explanation of, and tour of, some of the fossils, along with the home of Creation Research.

Praise The LORD for HIS Anointing upon your Ministry and your amazing achievement and thanks for the enormous amount of work that has been put into the site. I believe it to be a wonderful development. GLORY be to GOD. **Charlie & Anne**.

AMY SAVED - UK rep wrote "I have had a phone call from a pastor's wife in Kent where you spoke at their fellowship. She has been told by Amy, a young woman in her early 20s, that she was converted whilst you were there. Amy's husband had come to the church for the first time with a friend two or three weeks earlier, but Amy's first visit was the morning you were there. Amy shared with the pastor's wife how she had been put off Christianity at school and over the years had gathered lots of questions; many of them specifically about Genesis, but you answered every question she had in her heart so she committed herself to Christ. The pastor and his wife were thrilled to discover this news and wanted to share it with us. Many of the fellowship had told them that they were encouraged and helped in various ways by your visit, but Amy's news has topped all that!" Praise The LORD that he is still the "God-Who-Forgives" (Ps. 99:8).

ASK WEB BLESSING shares Canadian Pastor Andrew Robertson: "I do a radio show called Ask The Pastor and your ASK SITE is very helpful. I love the work you do! Praise God for Christians who are scientists! God bless!"

DEAR CREATION RESEARCH TEAM - Thanks be to the living God, our Father in heaven and Jesus Christ His Son who is Lord of Lords. May he continue to strengthen you and bless the message of the gospel through you and how He created the Heavens and the Earth. May he cut off all those who seek to undermine His truth before you and raise up more helpers to work with you. Thank you again in Christ Jesus, **Jodie Hunter**.
